# MARTINIQUE

French Island

Martinique is an **overseas regions of France**. The mix of French and Caribbean culture creates an alluring and unique vacation destination in which tourists get the best of both worlds: the warm weather, pristine beaches, and colorful attitude of the Caribbean as well as the posh and refined nature of France.

Martinique is located in the Lesser Antilles, surrounded by both the Atlantic Ocean and Caribbean Sea.

The island is home to rugged mountains, rivers, waterfalls, and forests. Martinique has a total area of 425 square miles, and is home to the still-active volcano, Mt. Pelee.

**The people of Martinique are known to have a higher standard of living than many other Caribbean nations.**

# HOW TO GO TO MARTINIQUE ?

**Martinique Aimé Césaire International Airport (FDF, formerly known as Lamentin International Airport) is the main airport of Martinique for surfers coming to the event.** Immigration is courteous and efficient at this large, modern airport, which has a number of ATMs, money exchange bureaus and restaurants.

**A non-direct option to reach Martinique is via St Lucia**, which is an island only 18 miles away from Martinique. The airlines companies that service St Lucia are : Air Canada, Air Sunshine, American Airlines, British Airways, Condor, Delta Airlines, JetBlue Airways, AmeriJet international, Corporate Air, DHL Aviation...

From St Lucia you will then need to travel to Martinique by plane or boat .

# SURF IN MARTINIQUE

Surfing in Martinique offers you the chance to indulge your passion against some of the most picturesque natural backdrops imaginable. Dawn and dusk are opportunities not to be missed whether you are riding your board or watching others whilst relaxing.

**The surf spots in Martinique are predominantly to the north** along the Atlantic Coast where as the Caribbean Coast generally lacks the swells. There are approximately 14 recommended spots.

- Basse Pointe, **le Chaudron** • 1
- Tartane, **Anse Bonneville** • 2
- Ste Marie, **Anse Charpentier** • 3
- Prêcheur, **Anse Couleuvre** • 4
- Prêcheur, **Anse Tomate** • 5
- Diamant, **Banzaï** • 6
- Ste Anne, **Sacrifice** • 7

The most well-known and frequented is **Anse Bonneville (plage des surfeurs)** on the Caravelle Peninsula. If you are lucky enough to be near **Anse Couleuvre** (northern tip of the Caribbean coast) at just the right moment it's possible to surf some of the best waves on the island :

a strong, fast tubular right of up to 3 meters with shallow bed.

Those who seek maximum thrills are urged to try the long waves that form a point break at the entrance to the **Basse Pointe** port flanked by high cliffs. As you can see it's impossible to be bored if you come with your board in Martinique.

In **Mars 2018 we are doing it again!** For the fourth time in a row a QS 3000 event will be organised in the north of the Island. The chosen spot is **Basse Pointe**.

**This year men and women will be competing.**

## THE WAVE

Type : **Reef-rocky**

Direction : **Right**

Bottom : **Boulders**

Power : **Hollow, powerful, fun, slab**

Normal length : **100 to 300 m**

Good day length : **> 300m**

## TIDE, SWELL & WIND

Good swell direction : **NorthEast**

Good wind direction : **West, SouthWest, South, SouthEast, East**

Swell size : **Starts working at 1.0m-1.5m / 3ft-5ft and holds up to 5m / 16 ft and over**

Best tide position : **All tides**

## YOUR BOARDS

### YOU DON'T KNOW WHAT TO DO WITH YOUR BOARDS AFTER THE CONTEST ?

We can buy it, just contact the Nicolas' (organisers) or Jean-Luc, your surfer Rep.

**contact@martiniquesurfpro.com** ● **+590 (0) 690 75 92 62**

# ECO-EVENT

## **SORT YOUR WASTE**

Yellow bins : recyclable plastic / paper / carton / metal

Blue & black bins : other waste, non-recyclable

Please do not throw anything in the ocean, grass or sand.

A green team will be working on the contest site, if you have any question, they will be happy to help !

## **RESPECT THE ENVIRONMENT**

If you can, use coral reef-safe sunscreen (and wax) for the environment. Indeed common chemical sunscreen ingredients, such as oxybenzone, can kill coral and damage coral reefs.

## **FOSTER CARPOOLING**

Carpooling cuts down on the number of cars on the road. Fewer cars means less carbon and other pollution getting into the air. This protects the environment by keeping the air, water, and land cleaner. Plus it helps you save money on rental and gas.

## **ASK FOR YOUR ECOCUP**

As a surfer, you will be given an ecocup on the first day. Please keep it and use it instead of non-recyclable plastic cup for coffee and juice.

Please, do not throw away half empty water bottles...

**LET'S BE ECO-RESPONSIBLE TOGETHER**
